## **To Whom It May Concern:**

**I've dedicated my lifes' work to the development of healing techniques that don't subject people to greater risk of injury or suffering. The rehabilitative regimen delivered with my IDD Therapy® protocols on the Accu-Spina® device are just that, an effective means of conditioning spinal function to stimulate natural healing at an intra-cellular level. My own studies established greater than 86% success rates. With the scientific data tracking built into the Accu-Spina, many of my colleagues have documented even higher rates of success within their own practice. In my view, the Accu-Spina system represents a new frontier in the merger of alternative healing arts and good medical science.**
